1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee, Korean Abstract 1020030096131. Lee discloses a device with an external electronic controlling device using an Algorithm License Permission chipset including a ROM. The external device interfaces with a ROM table and an operation device. The output of the operation device is connected to the external interface device by a result value output device and is connected to an external CPU.
